STUDENTS' WRITING ABILITY IN ONLINE ENGLISH LEARNING OF TWELFTH GRADE OF MIPA 2 OF SMA NEGERI TULAKANIN THE ACADEMIC YEAR 2020/2021. THESIS ARTICLE PINANINGSIH1588203028. Presented as Partial Fulfillment of the Requirements to Achieve the Strata One S-1 degree in English Education Program ENGLISH EDUCATION STUDY PROGRAM TEACHER TRAINING AND EDUCATIONAL COLLEGE STKIP PGRI PACITAN 2021. STUDENTS' WRITING ABILITY IN ONLINE ENGLISH LEARNING OF TWELFTH GRADE OF MIPA 2 OF SMA NEGERI TULAKANIN THE ACADEMIC YEAR 2020/2021. Pinaningsih1, Dr. Agung Budi Kurniawan, M.Pd. I2, Dr. Sri Hafidah, M.Pd.B1. 23.1 Pendidikan Bahasa Inggris, STKIP PGRI Pacitan pinaningsih94@gmail.com 2 Pendidikan Bahasa Inggris, STKIP PGRI Pacitan Agungbudi430@yahoo.co.id 3 Pendidikan Bahasa Inggris, STKIP PGRI Pacitan hafidahagustinasri@yahoo.co.id Abstract: The objectives of the research to find out of students' writing ability in online English learning. The method used in research was a case study. The researcher used the quantitative. The data were gathered of this study through tests. The subjects of this research were students of XII MIPA 2 at SMA Negeri Tulakan who were 20 students. This research finding showed that the mean score of students' writing ability is 70.85. Then the median of students' writing score is 66. The modus of students' writing ability is 57 and 64. The standard deviation in SMA Negeri Tulakan is 75. From the finding and data analysis, it can be concluded that there are 12 from 20 students get the score of writing under standard deviation. Then eight from twenty students get the score up to standard deviation. Most of them have difficulties in determining ideas or content, organization or coherence text, arranging language use or grammar, word choice or vocabulary, and mechanics errors including punctuation, capitalization, and spelling. There are some data or facts about students' ability to construct their. Based on the English teacher interview's result of the process of teaching English online learning is not going well. Both the teachers and students must be able to adapt to online learning. Another obstacle of online learning is some students don't have a cellphone that supports the online learning media. Many students had difficulties such as internet network constraints and limited quotas of internet data. Students are also less interactive in English online learning. Keywords: Case Study, Writing, Online learning BACKGROUND OF THE RESEARCH The COVID-19 pandemic has affected educational systems worldwide, including Indonesia. In education, teaching and learning activities are usually face-to-face or in direct meetings. Because of the presence of this coronavirus outbreak, so it must be done by an online system or by at home. Teachers and students meet online. This online learning system is carried out remotely by utilizing information technology. So, the online teaching and learning process relies on the internet, audio, and video connections in delivering material and submitting assignments for all subjects. English is one of the subjects that exist at all levels of education. In Indonesia, the implementation of the online learning model is a new challenge for English teachers, especially teachers of Senior High Schools. They must be able to adapt from face-to-face meetings to online teaching models. It is caused by the English online teaching and learning requires more effort and time than the conventional learning system. It should be made interesting for students otherwise they will lose their interest and get bored. So, to adapt the online English teaching and learning system, especially in senior high school the English teachers must be creative and able to create a fun online of English teaching and learning processes for their students. This is the biggest challenge for English teachers in the teaching and learning processes, especially in teaching writing. Writing is one of the language skills that must be studied seriously in the online teaching and learning processes. It is caused by the writing is a skill that can be categorized as one of the complicated and difficult materials. So that, students must more focus on learning it. The difficulties are in generating and organizing ideas, translating these ideas into a readable text, and learning several inadequate sub-skills of writing skills. It becomes more noticeable if their language proficiency is weak. So, writing needs a long process for its complex activities or process that involve a host of advanced skills which including critical thinking and logical development of ideas. Therefore, in online teaching and learning system, students must focus on the presented material by the teacher so that their understanding of writing skills can accept the material well. The skill to write is not only in the form of activities that transferring thoughts into written form but also in arranging the words into sentences in the writing process. According to Sara Weigle (2002:16), there are several aspects of writing skills in the students' communicative competence, especially in learning writing. The first is the content. According to Sarwanti (2015), it is getting the idea to create the topic or idea at the beginning of the writing process. In the content writing aspect, the students can develop their idea and describe them into the main topic. The second is the organization. According to Sarwanti (2015), coherence and cohesion are the characteristics of a good paragraph. It is how the students must arrange their words to be a good text and content. The third is vocabulary. Students can choose and use the appropriate vocabulary in each sentence. It is a very important thing in writing. O'Malley (1996) stated that vocabulary is the word choice, uses varied and precise diction appropriate for purposes. The next is grammar or language use. Sarwanti (2015) stated that linguistics competence refers to grammatical competence. The use of grammar can be applied in all kinds of sentence structures so that they will make the writing text to be more meaningful. The last is a mechanism which it means how the students write something. It includes spelling, punctuations, citation of references, neatness, and appearance. Those aspects are the students' needs to make a good writing text. In reality, students have some problems in their English writing processes in the ongoing of the online teaching and learning system today. Some of them have low scores in English writing skills. The problem may be caused by several aspects, first English is one of the foreign languages in Indonesia. English is not the mother tongue in country. The second is the students are not accustomed to learning English writing skills in an online system as same as today. So, there are some difficulties in understanding the material given by the teacher. It causes the students to make mistakes especially in determining the main idea, using a suitable word, and arranging the sentences to become a good paragraph. The last is that the teacher provides methods or techniques that may not support the students' learning motivation in their writing skills through the ongoing online English teaching and learning system today. To adapt writing online teaching and learning, the teachers must be creative to provide the materials and find relevant media to the online system to help the students solving their problems in writing skills. It is to improve the students' writing skills in the online teaching and learning processes. Some scopes of English writing skills are to create various meanings of the short functional text, monologue, and essay. In the practice of writing, students are expected to be able to improve their writing skills. It is caused by the writing skill is one of the important skills that must be mastered by the students. The students' writing skills must be developed although in the online teaching and learning models. So, it is the reason why the research should be done. The objectives of this research is to determine students' writing ability during Online English learning process. Academically, this research is expected to make a scientific contribution to the education world especially about the students' writing ability in online English teaching and learning processes. While practically, this research is expected to provide some benefits through the presented analysis by the researcher especially in English education. RESEARCH METHODOLOGY Research Design The type of this research design is a case study. According to Yin (2003), Case study is an empirical inquiry that investigates a contemporary phenomenon within its real-life context: when boundaries between phenomenon and context are not clearly evident and in which multiple sources of evidence are used. In research, the researcher applied the quantitative method. Bryman (1995) stated that quantitative research is structured in the sense that sampling determination and data collection instruments, for instance, are designed prior to the data collection process. Data of the Research This part consists of three issues. The first issue is the place of the research. This research, the researcher chose SMA Negeri Tulakan as an object to take the data which was located on Jl. Raya Pacitan-Lorok 4,7 km, Noneng, Bungur, Tulakan, Pacitan, Jatim (63561). The second issue is time of the Research. This research conducted from March, 5th until Mey, 5th 2021 of the even semester in the academic years 2020/2021. The last issue is the Subject of the Research. This research, the population includes all twelfth grade students of the SMA Negeri Tulakan in the academic year 2020/2021. In the twelfth graders there are five classes, those are: class XII IPS 1, XII IPS 2, XII MIPA 1, XII MIPA 2, and XII MIPA 3. The total number of twelfth grade consists of 120 students. In research, the researcher chose one of the five classes namely XII MIPA 2 which is consists of 20 students. The researcher took purposive sampling as the sample to take the data. According to Barreiro and Albandoz (2001), the purposive sampling technique was used to make the sample representative of the purpose of the study. That means the researcher only chose one class from the whole class as the sample to take the data, namely XII MIPA 3 which is consists of 20 students. Research Instruments To measure the data the researcher used some instrument as a measuring tool in process of collecting the data. The aim is to facilitate systematic research. In research, the researcher used some instruments. The first is handphone. The Handphone is used as a supporting instrument in conducting this research. In today's online learning, the data taken from the using of the Handphone. Then test material. In research, the researcher prepared the material to conduct the test. In this case, the researcher gave one test of writing to the students. Instruction of writing English text. It is a step-by-step explanation given to the students in writing texts according to the topics, themes, and genres. Then Rubric of writing score. It a scoring tool or a way to measure evaluation criteria or grading standards based on the expected outcomes and performances of students. This research, the researcher chose scoring scale of writing work by Sara Weigle. It is to assess the students' skills in writing which consist of content, organization, vocabulary, language, and mechanics. The rubric of writing score is used because this type assessment is the easiest and the most practical. The Technique of Collecting and Analyzing the Data To get the data, the researcher collected the data used test as a data collection techniques. According to Arikunto (2014), test is a series of questions on exercises and other tools to measure skills and intelligence knowledge by individuals or groups. The test is used for getting data on the result of research. The purpose of the test is to know the result of students' English writing ability in online learning through a test given by the researcher. In research, the researcher gave one test to the students. The researcher asked students to write English text that was given online in-class group of Whatsapp application. After collecting the data, the researcher analyzed the data. In research, the researcher analyzed the data with a statistical approach. Statistics is a scientific method that is prepared to collect, compile, and analyze research data in the form of number. Data analysis was performed using tables and percentage descriptive with formula as below: $Mx = \frac{\sum X}{N}$ Where: Mx: The mean of Students $\sum X$: The total score N: The Number of students FINDINGS AND DISCUSSIONS Findings From the data analysis, the score of the mean of students' writing ability is 70.85. Then the median of students' writing score is 66. The modus of students' writing ability is 57 and 64. The standard deviation in SMA Negeri Tulakan is 75. Then the researcher made percentages in chart form to find out the number of students' writing level of components' writing score. It can be seen in the chart below: Chart 1. Students' Writing Score Level Based on the chart showed above, it can be seen that in content 20% students got good level score. 40% students got average level score. 40% other students scored in poor level. Then in the organization, there were 40% students who got a good level score. Then 60% students scored in average level. Next in vocabulary, as many as 40% students got a good level score. 30% students scored in average level. Then 30% other students got score in poor level. While in language use there were 65% students who got an average level score and 35% other students got poor level score. The last one is mechanic. There were 25% students got a good level score and 50% students who got average level score. Then 25% other students got poor level score. Discussions Based on the data found by the researcher above, there are some students' writing ability including lack of content, lack of organization or coherence text, less of word choice or vocabulary, less of grammar or language use, and mechanic errors (capitalization, spelling, and punctuation). The data would be analyzed as below. Lack of content or ideas Content or ideas is the main ability to create the good writing. The content must relevant to the topic and accurate details. According to Sarwanti (2015) it is getting the idea to create the topic or idea at the beginning of writing process. 8 students cannot write the text relevant to the assigned topic. The text is not enough to evaluate because it is not pertinent to the topic. Students' writing does not match the instructions and material conveyed through the Whats-App application. Lack of organization or Coherence text According to Sarwanti (2015) coherence and cohesion are the characteristics of good paragraph. To create coherence and cohesion, a writer should write the idea in sequence. It means that there are no jumping idea in writing. 12 students cannot write the coherence text correctly. The text is loosely organized, incomplete sequencing and limited supported. According to Sara Weigle (2002:16) states the good criteria of organization or coherence text are fluent expression, ideas clearly stated/supported, succinct, well-organized, logical sequencing, cohesive. Less of Word Choice or Vocabulary It covers the wide range of vocabulary, the accurate word/idiom choice and usage, and the appropriate selection to match register. O'Malley (1996) states that vocabulary is the word choice, uses varied and precise diction appropriate for purposes. Based on the data finding there are 6 students do not use an effective word or idiom. The text has occasional errors of words or idiom form, choice, usage, but meaning not confuse or obscured. The good criteria of vocabulary are sophisticated range, effective word, idiom choice and usage, word form mastery, appropriate register (Sara Weigle, 2016:16). Less of Grammar or Language Use Sarwanti (2015) states that linguistics competence refers to the grammatical competence. It is focuses on building sentences, such as understanding part of speech, tenses in active and passive, and conditional sentence. It means that the students should be able to understand part of speech and to make sentences correctly. 7 of students doesn't use an effective simple grammar structure. It has frequent errors of tenses, number, pronouns, prepositions, to be/ linking verb. The meaning of the text is confused and obscured. The good criteria of language use are effective complex constructions, few errors of agreement, tense, number, word order/function, articles, pronouns, prepositions (Sara Weigle, 2016:16). Mechanic Errors (Punctuation, Spelling, Capitalization) It covers full comment of spelling, punctuation, capitalization, and layout. 5 students cannot write the text with good spelling, punctuation, capitalization, and paragraphing. The text meaning is confused and obscured. To make a good mechanic student are able to demonstrates mastery of conventions. The text is uses capitalization, spelling, and punctuation correctly (Sara Weigle, 2016:16). CONCLUSIONS AND SUGGESTIONS Conclusions Based on the data finding and discussion of the research researcher found, the score of the mean of students' writing ability is 70.85. Then the median of students' writing score is 66. The modus of students' writing ability is 57 and 64. The standar deviation in SMA Negeri Tulakan is 75. From the finding and data analysis it can be concluded that there are 12 from 20 students get score of writing under standart deviation. Then eight from twenty students get score up to standart deviation. Most of them have difficulties in lacks of ideas or content, lack of organization or coherence text, less of language use or grammar, less of word choice or vocabulary, and mechanics errors including punctuation, capitalization, and spelling. Based on the result of interview, the process of teaching English online learning is not going well. Both of the teachers and student must be able to adapt to online learning. Another obstacle of online learning are some students don't have a cellphone that supports the online learning media. Many students had difficulties such as internet network constraints and limited quotas of internet data. Students are also less interactive in English online learning. Suggestions Referring to the findings, it is suggested that the school to be able to carry out online English learning, firstly, must provide facilities and infrastructure such as cellphones and internet data packages so that learning can be applied. For the teacher must build good communication with students. It is to make the active online English learning especially in writing teaching and learning. The teacher in online English learning must give more explanation how to write correctly including content, organization, vocabulary, language use, and mechanic to the students before asking the students to write. Then the third, the researcher suggests the students. The students must be able to improve their skill and knowledge in technology and computer so that online English learning can be done easily. The student should learn more about writing including content, organization, vocabulary, language use, and mechnics to improve their writing ability to be better. The last is suggestion for future researchers. The researcher expects the next researcher to prepare the researchs' needs; before and during conducting the research. In the other hand the researcher has to know the research subject matter deeply especially in case study research. BIBLIOGRAPHY Barreiro, P. L. And Albandoz, J. P. (2001) Population and Sample.
